

# GLOBAL OIL AND GAS SUPPLIES

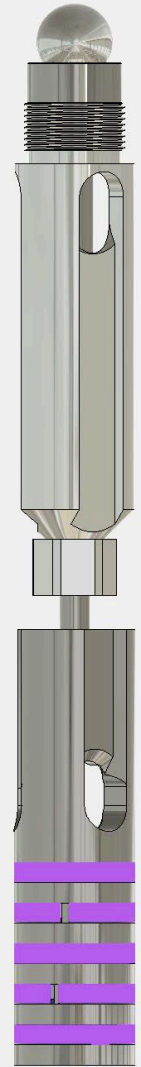

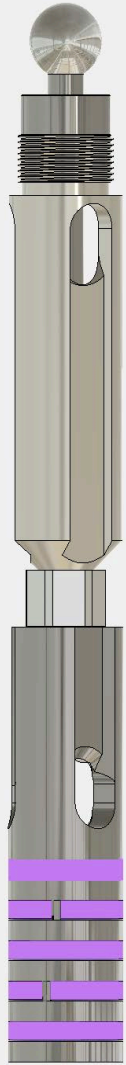

## T600 (The Gas Terminator)

### Features

- Stainless steel alloy components to withstand corrosive environments
- Superior exterior flow channel design and ring style wiper rings enable production volumes greater than any tool on the market
- Eliminates pressure drops as fluid is not channeled through the center or small ports
- Ring style plunger and solid plunger design available

### Benefits

- Eliminates gas locking
- Pump high gas to liquid ratio wells
- Increases production in horizontal and deviated wells
- Dramatically improves production over existing solutions in gas locking wells
- Eliminates need for re-spacing to get gas lock out of pump
- Elongates pump and equipment life
- Achieves maximum pump efficiency
